

M5 Junction 25 Improvements Scheme

Project Update: 12th July 2019

Upcoming Toneway Work

We will soon be starting work to widen the A358 Toneway. This will include removing the central reservation and replacing the old concrete carriageway – important work to eventually increase the capacity of the road.

To keep both the public and the workforce safe it will be necessary to temporarily reduce the speed limit to **30mph** and reduce the number of live lanes on the Toneway whilst works are undertaken.

Two narrow lanes will be maintained during the day heading inbound towards Taunton from Junction 25 and one lane will be available for traffic heading outbound from Taunton towards Junction 25. This is due to deep excavations in the highway and the need for working space during the construction works.

From **Saturday 27th July between 8pm and 6am** the A358 Toneway will be closed for **four nights** between the Heron Gate roundabout and Junction 25 while traffic management is installed. Diversion signs will be in place and you can see the diversion route on the map at <https://www.travelsomerset.co.uk/roadworks/>

We expect this arrangement with two lanes inbound and one lane outbound to remain in place until summer 2020 before works switch elsewhere and we'll keep you updated.

For more information, including FAQs, please visit <https://www.travelsomerset.co.uk/j25/>.
